

6Days Wilderness of Tanzania Scheduled Safari

Guaranteed Scheduled Safari Departing Every Wednesday: Min 2Pax

6Days/5Nights Ngorongoro, Serengeti and Lake Manyara Safari

Accommodation in any of the below listed options

Ground Transportation using 4X4 Safari Landcruisers

Safari Prices are Valid from January to Dec 2019

Safari Overview: This 6 days safari explores Tanzania's greatest wildlife areas; Manyara National park, Ngorongoro, Serengeti and Tarangire National park. You will stay for 2 nights in Ngorongoro, 2 nights in Serengeti, 1 night in Lake Manyara & 1 night Tarangire. Visit Lake Manyara famous for its tree-climbing Lions the only kind of their species in the world. The Ngorongoro Crater has breath-taking views and phenomenal game, Serengeti has some of the highest wildlife concentrations in the whole of Africa. Adding to the resident wildlife is the annual migration of the wildebeest – but getting the timing right is a science in itself!

Itinerary at a glance

Day 1: Arrival in Arusha and drive to Karatu

Meet in Arusha. After lunch, drive through the Iraqw tribe farmlands to your lodge situated in Karatu just outside the Ngorongoro Conservation Area. The crater covers over 300 square kilometers of land and is the home of the rare black rhino, prides of lion, elephant, cheetah and great herds of buffalo, antelope and wildebeest. **Dinner and overnight at Ngorongoro Farm House**

Ngorongoro Crater: A UNESCO protected World Heritage Site and an International Biosphere Reserve, the Ngorongoro Conservation Area is a pioneering experiment in multi-purpose land use where people (the Maasai), their livestock & wildlife coexist and share the same protected habitat. The craters of Ngorongoro and Empakai are reserved exclusively for wildlife, while the rest of the Conservation Area is shared by wildlife, people & livestock. The Maasai, who reside in Ngorongoro, are pastoralists who move widely with their herds of cattle, sheep, goat and donkeys in search of pasture and water. In recent years the Maasai have been encouraged to work on the land and supplement their traditional diet of milk and meat.

The Ngorongoro Crater, which is the central attraction in the area, is the largest Caldera in the world that has its walls intact. The Ngorongoro Crater floor, a sheer drop of 610 meters below the crater rim, has an area of about 300 square kilometers, with a diameter of 19 kilometers. The sight of the Ngorongoro Crater is simply stunning. "There is nothing with which to compare. It is one of the wonders of the world..." once wrote Professor Bernard Grzimek. The crater floor is home to tens of thousands of plains animals, including wildebeest, zebra, gazelles, elands, and a large predator population of lions, hyena and jackal which can all be viewed at close quarters. The rare black rhino can be viewed here, and if you are lucky you can see

cheetah and leopard. The rain season is between November and May. The altitude at the crater rim is about 2286 meters above sea level, and temperatures can get quite chilly in the evening, especially between May to September.

Day 2: From Karatu to Ngorongoro Crater return to Karatu for Overnight

Today you will drive to Ngorongoro Conservation Area and descend over 600 meters to the floor of the crater for a day crater tour. Explore the forest areas that are inhabited by monkey and elephant, the lake area, where you may see the flamingos and the open savannah where the lions hunt for food. Picnic lunches will be served in the crater. Late afternoon drive back to Ngorongoro Farm House for **dinner and overnight**

Day 3: Karatu to Serengeti National Park

After breakfast drive to Oldupai Gorge, site of Louis and Mary Leakey's renowned archaeological discoveries. Their findings include some of the man's earliest known ancestral remains. Continue to Serengeti National Park in time for lunch. This enormous park supports every variety of animal imaginable - from large predators such as lion, leopard and cheetah to the smaller herbivores they prey on. Afternoon game drive, overnight at a lodge in Serengeti Optional: Maasai Village visit.

Serengeti National Park: A World Heritage Site and recently proclaimed a World Wide Wonder, Serengeti National Park is undoubtedly one of the most famous wildlife sanctuaries in the world. The park is located some 320 km to the northwest of Arusha, lying in a high plateau between the Ngorongoro highlands and the Kenya/ Tanzania border, and extending almost to Lake Victoria to the west, covering a total area of 14,763 square kilometres. Aptly named "endless plains" by the Maasai people, you immediately experience this vastness as you enter the southeastern plains of the park from Ngorongoro.

Declared a protected area in 1921 and gazetted as National Park in 1951 Serengeti is the oldest National Park in Tanzania. The principal features of the Serengeti are the short and long grass plains in the south and east, the acacia Savannah in the central areas, the hilly and densely wooded areas in the north and the extensive woodland in the west. There is a variety of scenery, which include the plains, lakes, hills and the rock outcrops called kopjes. The main game drive areas in the Serengeti are the Seronera Valley, the Western Corridor, and northern Serengeti. The Seronera valley in central Serengeti, endowed with permanent surface water, attract a large concentration of wildlife throughout the year. Common animals that can be seen here are lions, buffaloes, impalas, hippos, waterbucks, elephants, cheetahs, the leopard, and over 400 species of birds. Serengeti provides sanctuary to the highest concentration of plains animals in the world.

Day 4: Full day in Serengeti National Park

Today you spend the whole day on game drive in this National Park, which is rich with all different species of animals. To maximize game viewing you will carry a picnic lunch with you and spend the full day in the Serengeti National Park. **Dinner and overnight at a lodge in Serengeti**

Day 5: Serengeti National Park to Manyara National Park

Breakfast at your lodge and drive to Lake Manyara, a soda lake lying in the Rift Valley, Lunch at Kirurumu Tented Lodge In the afternoon game drive in Lake Manyara National Park, home of the tree-climbing lions. Apart from the varied types of landscape including jungle, swamp and savanna, there are also a large variety of animals including Giraffe, Zebra, Elephant, Gazelle, hippos, monkeys and about 400 different species of birds.

Dinner and overnight in Kirurumu Tented Lodge

Lake Manyara National Park: Located 125 km west of Arusha town, on the foot of the wall of the Great Rift Valley, Lake Manyara National Park is one of the oldest and most popular sanctuaries in East Africa. The park has a large variety of habitats, making it possible to support a wealth of wildlife in its small area. The main habitats include the shallow soda lake itself which occupies 77% of the National Park total area of 330 square kilometres, the ground water forest, open grassland, acacia woodland and the rift wall. The most famous spectacle in the park is the tree-climbing lions, which are occasionally seen along branches of acacia trees. Other animals found in the park include buffalo, elephants, leopards, baboons, impala, giraffes, zebra, wildebeest, ostrich and hippos. Popularly referred to as an ornithologist's paradise, Lake Manyara National Park contains over 400 bird species found in most savanna and river habitats in East Africa. Common water birds to be seen

here are pelicans, spoonbills, Egyptian geese and the migratory flamingoes, which arrive in hundreds of thousands creating one of Africa's great natural sights over the soda lake.

Day 6: Manyara to Arusha

After breakfast drive to Arusha Lunch in a restaurant

*****end of our services, wishing you an excellent safari*****
